

A CZECH SUCCESS

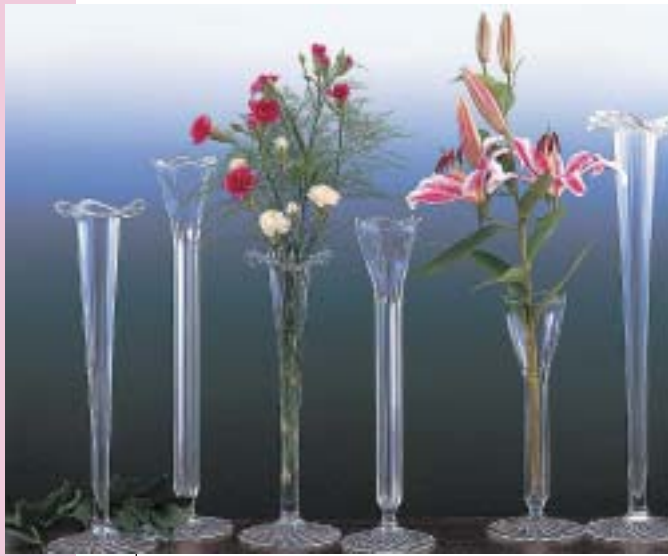

In Bohemia, approximately 100km North of Prague lies Železný Brod, a small town but known worldwide for its high-quality glass-blowing industry. At the beginning of the 20th century most of the production in the region consisted of "bijouterie" made by small entrepreneurs. The first producers of art glass appear around the same time.

At the beginning of the 20th century most of the production in the region consisted of "bijouterie" made by small entrepreneurs. The first producers of art glass appear around the same time. **Detesk S.r.o.** enterprises (decorative and technical glass) was founded in 1990 by Mr Ivan Kalousek, an expert in the technology of production and processing of technical glass. He had worked alone, producing mostly ornaments, until mid-1992 and many products designed by him are still being produced in Železný Brod today. The first employee of Detesk enterprise was hired in June 1992. The development that followed resulted in Detesk becoming one of the most important companies in the field of processing of technical glass-metals. Currently occupying the leading position within the field of special assortments (original liquor bottles, drinking sets, decorative articles, products of a technical nature, etc.), Detesk (a limited company since May 1, 2004) employs almost 150 people in high-tech plants. In addition to small-scale sales in the Czech market, most of the firm's production is shipped abroad, in particular to Western Europe, but also to Japan, South Korea, North and South America, Australia and South Africa.

In 1997, Detesk became the exclusive distributor of tubes, micro tubes and bars made of Duran® glass for the Czech Republic.
